Bukit Jalil, Kuala Lumpur

A passionate Full-Stack Jedi with experience in developing applications and web systems, from concept to deployment. I have successfully launched several web system applications on the Play Store and App Store. I am currently working as a Software Engineer at one of the private company in Selangor. Outside of coding, I'm an avid sports enthusiast who can talk sports all day long! Eager to continue honing my skills and take on new challenges.

PROFESSIONAL EXPERIENCE

IntecX Creation Sdn Bhd

May 2023 - Present

Software Engineer

- Engineered and maintained state-of-the-art web solutions and applications, seamlessly fusing geographic information systems to enrich client interactions.
- Pioneered the advancement of dynamic web platforms primarily utilizing the PHP framework Laravel and PostgreSQL database technology.
- Drove mobile development efforts utilizing Xcode and Android Studio, ensuring cross-platform excellence.

Zaiwani Holdings Sdn Bhd

August 2021 - April 2023

IT Executive

- Led the conception and management of the MaQan Delivery App Project, using Ordering.co CMS platform to craft a user-friendly and dynamic application tailored specifically to the MaQan brand.
- Simultaneously, orchestrated bespoke web development initiatives for a diverse clientele, harnessing the flexibility and power of the WordPress CMS to deliver captivating and functional websites that exceeded client expectations.
